

Data Science Project

First Presentation Guidelines

The purpose of the first project presentation is to evaluate the level of understanding of the task in the project, and get a first feedback on the project.

The presentation should take a maximum of **15 minutes** (so around 10-15 slides). It should touch on the choice for project implementation, the state-of-the-art, and the division of tasks in the project.

Suggested contents:

1. **5min**, for related work and the choice of the approach that will be implemented
2. **5min**, implementation, dataset and evaluation choices
3. **5min**, project management (division of tasks, etc.)
